# NORITZ

Tankless Water Heater Accessories
Specification Sheet
System Controller

- Available System Controller models can provide a central communication link for up to 6-unit, 12-unit, or 24-unit Multi-Systems

- Provides fully modulating operation among all units (user selectable option to fire 1 or 2 units default by default)

- Rotates the operation of the units within the Multi-System for even wear

- Only one Remote Controller is required to control and monitor all the units connected to the System Controller

- Pump control allows for a pump(s) to be connected and controlled with built-in timer and aquastat features

- Auxillary back up allows for continued system operation during partial failure conditions.
